CURRICULUM VITAE

Objective To find a creative position where I can use my broad knowledge of storage, backup, Unix, scripting, network protocols. My good orientation in high availability, virtualization and security areas allows me to design storage and backup infrastructure in enterprise environments.
To learn new technologies, methodology. The opportunity to work in multicultural environment with English as a main corporate language is a plus.

Personal summary I am a highly skilled goal oriented team player with ability to design cost-effective enterprise solutions, offering technical and management experience with customer satisfaction as my prime focus. I can prove my ability to follow methodology for project management and IT infrastructure and operations management.

Target job Work load: Full-time, contract
Career level: Experienced (20+ years)
Authorized to work in: EU

Skills

Technical knowledge

- SAN, NAS storage (HP, EMC) 
- NAS storage (NetApp, EMC) 
- backup (NetBackup) 
- tape libraries (Quantum) 
- HPUX, Linux 
- MS Windows 
- network protocols, firewalls 
- scripting (shell, perl) 
- high availability 
- monitoring 

Service oriented skills

- Service specification, support model, SLA 
- change management, incident management, problem management 
- plan changes with minimal impact to customers 
- prioritization of tasks according business needs 

Personal skills

- troubleshoot across various areas (storage, network, OS) 
- reliability and ability to work under pressure 
- analytical and synthetic abilities 
- presentation skills 
- understanding customer needs and requirements and translate them to the effective solution 
- teach people stuff I know
